AERIAL YOGA

TEACHER TRAINING

LEVEL 01 / 25 HOURS

An intimate, immersive training in Bali. Rooted in movement, thoughtful teaching and the confidence to fly.

MOVE / TRUST / FLY

BALI, INDONESIA

FRIDAY - SUNDAY INTENSIVE

More than a training.
A new way to teach.

Aerial yoga is more than a collection of beautiful shapes. It is a dialogue between the body, the fabric and the space around us. This Level 1 immersion is designed to help experienced yoga practitioners and teachers understand that dialogue - and begin sharing it with care.

THE EXPERIENCE

Three intensive days of movement, exploration, discussion and supervised teaching practice. We combine practical biomechanics, aerial technique and teaching methodology with a welcoming, supportive learning environment.

WHO IS IT FOR?

Yoga teachers who want to expand into aerial yoga, and dedicated yoga practitioners with approximately three years of practice who have already experienced aerial yoga. Previous aerial practice is essential; no previous teaching qualification is required.

WHAT YOU WILL TAKE AWAY

A stronger technical foundation, a clear approach to class planning, practical tools for spotting and communication, and a more confident understanding of your responsibility as a future teacher. Teaching readiness is assessed individually, not guaranteed by attendance alone.

The curriculum

25 hours of intentional learning

01 Aerial foundations & equipment

Fabric types, hammock height, equipment checks, setup principles and safe use of the space.

02 Biomechanics & body awareness

Load, joint positioning, active engagement, spinal movement and the role of individual anatomy.

03 Poses, transitions & inversions

Foundational shapes, entries, exits, progressive transitions, controlled inversions and regressions.

04 Safety, spotting & adaptations

Risk assessment, contraindication screening, spotting boundaries, communication and modifications.

05 Yoga philosophy & class design

Mindful intention, breath, sequencing, pacing, accessible cueing and the arc of an aerial class.

06 Teaching lab & assessment

Peer teaching, observation, constructive feedback, practice sequencing and final demonstration.

MEET YOUR TEACHER

Naiasandy

My journey into yoga began with aerial yoga. It was the practice that opened the door to everything that followed.

When I started practicing - and later teaching - I did not always have the clarity or confidence I wished for. I created this training to share the guidance I would have loved to receive: thoughtful technique, honest support, strong foundations and the freedom to develop your own voice.

My intention is simple: to help you feel prepared, curious and empowered, while always placing your students' safety first.

Everything I wish I had known when I started.

Your Bali immersion

An intimate retreat experience

THE TRAINING INCLUDES

25-hour Level 1 curriculum, guided practice, teaching labs, training materials and a certificate of completion subject to meeting the training requirements. The residential option also includes accommodation and three meals daily.

INVESTMENT

RESIDENTIAL

€650

Accommodation + full board

NON-RESIDENTIAL

€450

Training without accommodation

Proposed launch prices - subject to final confirmation.

FORMAT & NEXT STEPS

Friday to Sunday intensive in Bali, with a planned residential stay from Friday to Monday. Exact dates, accommodation arrangements, meal inclusions and daily schedule will be confirmed before bookings open. Completing 25 contact hours over three days requires long training days and a carefully planned timetable.

LEVEL 2 / AN ADDITIONAL 25 HOURS

A deeper continuation is planned, bringing the pathway to 50 hours in total.
